LiveNote Stream

San Francisco's LiveNote Inc. (www.livenote.com) says that its new LiveNote Stream broadcasts video, voice, transcript text and instant messages among legal teams. Authorized parties can follow litigation events from any location. Offered in partnership with Courtroom Connect (www.courtroomconnect.com), LiveNote Stream is available for use with any deposition, conference, or court proceeding worldwide.

Participants require a broadband internet connection and Microsoft Internet Explorer to attend. LiveNote SR desktop software users are able to mark and annotate the realtime transcript text as it is received. After the broadcast, the transcript and synchronized video can be uploaded to RealLegal iBinder for on- demand web access, or imported into LiveNote SR or RealLegal Binder for further review and summarizing.
